

Essis Collection - Introduction

Essis by Lasilinkki

Lasilinkki Oy is a reputable full-service glazing company from Kuopio, with four decades of experience in the design and execution of glass solutions. Essis by Lasilinkki is a trademark belonging to the third generation entrepreneurs of the company.

Essis was born out of love for glass elements in interior design, after having discovered the various glass melting possibilities.

Essis products are always unique and hand-crafted in our workshop.

Light, transparent and multiform. All the properties that make glass glass. We are an engine, an enabling expert, who wishes to make the endless uses of glass easily accessible for everyone.

Sunrise shower glass

Product: Sunrise

Designed by famous Finnish designers
Saana and Olli

Stripe doors

Essis stripe doors are produced by hand with dimensions ordered by the client. The pattern and lively surface structure are achieved by melting the glass and then tempering it into a safety glass. Essis doors are moisture-proof and durable to intense temperature fluctuations. Essis stripe doors are available in clear and gray glass. With or without frame.

Glass doors

Essis glass doors are produced by hand with dimensions ordered by the client.

The doors are produced with the same patterns and colours as the sliding doors, shower walls and glass wash basins.

Essis doors are moisture-proof and durable to intense temperature fluctuations. The doors are produced with the same patterns and colours as the sliding doors, shower walls and glass wash basins.

Wall panels with recycled glass filling

Essis kitchen wall panels, which glitter beautifully in light, are hand-crafted from recycled crushed glass with measurements ordered by the client. The front face of the glass is smooth and therefore easy to clean.

Recycled glass mirror

Essis mirrors are made

from molten crushed recycled glass.

Mirrors are available with or without lighting, and always made to measure.

A led-lighting installed behind the frame

The lights and transformer are splash proof; therefore, the mirror is also suitable for wet rooms.

Recycled glass selves

Recycled glass selves are made from recycled crushed glass.

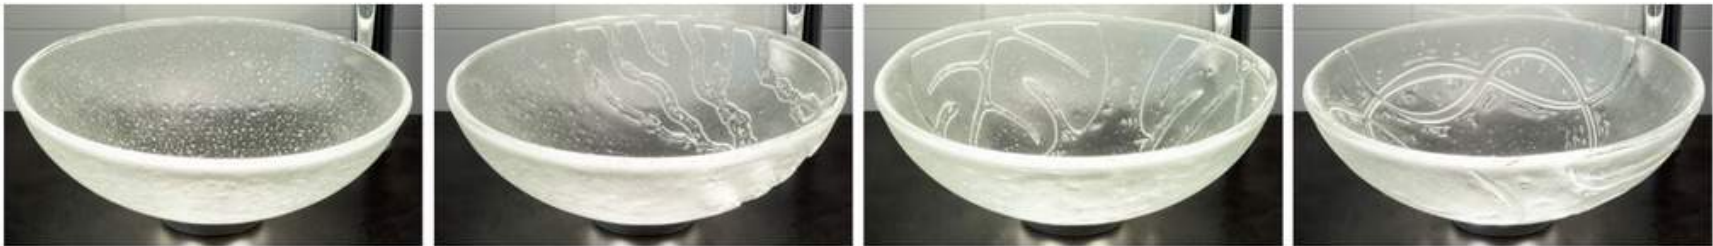

Glass wash basins

Illuminated Essis glass wash basins are durable and easy to clean. A led light installed in the outlet spreads light along the edges of the basin, bringing the melted pattern to life. The wash basins are produced with the same patterns and in the same colours as the glass doors, sliding doors and shower walls.

For your order, please select the colour and pattern of the glass, and specify the installation method of the wash basin.
